About Cuisine Solutions

Cuisine Solutions is an international team of award-winning chefs who were among the first in the world to recognize the power and precision of the sous vide process. Our classically-trained chefs develop recipes that allow fellow professional chefs and passionate foodies to present restaurant-quality dishes faster and more economically—with consistently excellent results.

Major retail chains and top specialty retailers alike offer their customers memorable meals in minutes with our restaurant-quality fresh and frozen packaged foods. They also rely on our sous vide products to expand their prepared deli foods and Home Meal Replacement (HMR) offerings and to supply their private-label lines with premium-quality selections.

What is Sous Vide?

Sous vide – French for "under vacuum" – is an innovative cooking technique we've been perfecting and pioneering since 1971. Food is vacuum sealed in a specially-designed pouch and cooked in water at a precise time and temperature until perfectly cooked, and then flash-frozen or refrigerated. No other cooking method produces such textures and flavors or maintains the natural integrity of food sources so well. That's why our products are trusted by the world's top chefs and favored by passionate foodies.
